

**Veratad Technologies, LLC**  
**Sample Entry Process Flow: IDMatch**

Initial Entry Screen	
First Name	
Last Name	
Street Address (or PO Box)	
City	
State	
Zip Code	
DOB	

Retry Entry Screen	
Same as Initial Entry Screen	
Incorporate Text for:	
• Previous Address	
• Previous/Maiden Name	
Loop - Initial Entry	

Response Code Key	
" 1 "	= Positive
" 2 "	= Negative
" 3 "	= Unavailable
" 4 "	= Differences
" 5 "	= Ambiguous

**Hint:** Two address are provided: Closest and Newest. The Closest is the address found which is the best match to the initial entry. The Newest is the most recent address on file. You can determine if the Input Address is the Newest Address by comparing the house number and zip code fields of the return to the input data.
