

IDresponseSM

Account Credentials

Dear Client,

We are pleased to welcome you as a new customer of **Veratad Technologies, LLC**, please find below the details of your account that will allow you to access our service. When accessing our service please understand that you have two different types of accounts, one that is connected to **LIVE** data and another that is connected to our **TEST** database.

Live Accounts: Please note that any and all transactions run through one of your LIVE accounts are a billable verification and you will be charged.

1. **Admin Account** – This account will allow you to immediately run LIVE transactions in our Virtual Terminal.
2. **Web Service Account** – This account will be used by your developer when they are ready to send LIVE transactions to our Gateway.

Test Accounts: Please note that any transactions run through your TEST account will not be billed.

3. **Web Service Test Account** – This account will be used by your developer during the implementation process and the sample identities can be found in the “Test Key”.

IDresponse Account Credentials		
LIVE ACCOUNTS
